

Hand mixers

Motor
Powerful and long-lasting, perfect for mixing

Guard handle
Multifunctional, this is for picking up and putting down the machine with ease, and also protects against break-age and dirt

Electronic speed controls
Infinitely variable for splash-free mixing

Design
Attractive and forward-looking with unbreakable and light housing

Safety lock-off
Safeguard for unintentional start-up

2-speed gear unit
Optimal power utilization at slow or fast rotating speeds

Ergonomic grip
For comfortable and energy-saving working

High-duty gear unit
Powerful and wear-resistant for optimum power utilization and a long life

M14 tool connection
For no-loss power transmission and quick tool change-over

Which drive is best for mixing jobs:
If you want to use a power drill for mixing jobs, make sure that its motor is powerful enough. The load exerted on the machine depends on the size of the mixing attachment and the material to be mixed. Too big a mixing attachment or too viscous a material will result far lower cooling of the drive motor and the machine will burn out. For major mixing jobs it is always best to use a suitable hand mixer.

Hand mixers

Model
CX 10 with WK 120
CX 10 with LX 120

Applications
WK 120 for cement, plaster, ready-mixed mortar
LX 120 for paints, primer coats, joint cement

Electronic machine with 1-speed gear unit, exceptionally light, compact and economical. Powerful and reliable, it is ideal for mixing loads of up to approx. 30 liters. Infinitely adjustable speed control, with guard handle. Available in 230 V and 110 V!

Model
CX 20 with WK 120
CX 20 with LX 120

Applications
WK 120 for cement, plaster, ready-mixed mortar
LX 120 for paints, primer coats, joint cement

Mixer with 2-speed gear unit with infinitely adjustable speed control for handling the widest spectrum of mixing jobs with professional ease. Rugged and powerful, it is designed for universal use for mixing loads of up to 40 liters. The ideal tool for the finishing tradesman. Available in 230 V and 110 V!

Hand mixers

Model
CX 40 with WK 140
CX 40 with MK 140
CX 40 with LX 150

Applications
WK 140 for cement, plaster, ready-mixed mortar
MK 140 for mortar, screed, quartz-filled material
LX 150 for paint, primer coats, jointing cement

Universal professional mixer to satisfy higher demands. Powerful motor, 2-speed gear unit, electronic speed controls and rugged drive system for reliable processing and a long useful life. Ideal for high-viscosity (semiliquid) mixing loads of up to 65 liters. Available in 230 V and 110 V!

Model
CX 60 with MK 160

Applications
MK 160 for mortars, screed, quartz-filled material

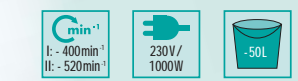

The top-class machine for heavy-duty and demanding professional applications. Featuring a 2-speed gear unit and electronics, this is a highly powerful tool even in continuous use. The champion among the professional tools for tough daily use at the building site. Available in 230 V and 110 V!

DUO hand mixer

Designed for medium-sized loads, this compact forced-action mixer is notable for being a highly powerful and versatile tool; easy to guide even in the most viscous of materials; infinitely adjustable speed controls; with HEXAFIX quick-action coupling.

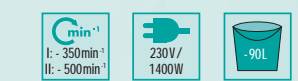

Art.No. Model
20.201 CX 22 DUO with MK 120 HF
44.070 1 set MK 120 HF

DUO hand mixer

To help you master every material! This is a powerful forced action mixer for the highest of requirements; powerful and uncompromising in the material, it is comfortable to use and takes the physical strain off the user; infinitely adjustable speed controls; with HEXAFIX quick-action coupling.

Art.No. Model
20.251 CX 44 DUO with MK 140 HF
44.080 1 set MK 140 HF

TMS power mixer

Automatic compact mixer for standard bags of mortar, adhesive, plaster, screed and gravel concrete (-16 mm). Simple operation, high mobility and perfect mixing results are the attributes of this unit. The finished mix is discharged through the bottom opening into a wheelbarrow or tub. Maximum mixing volume: 80 liters Drive: 2 kW, 230 V.

The mixing tools

A mixing tool with a plastic basket and a galvanized shaft. Suitable for small volumes of thin-bodied materials, including those containing solvents, e.g. paints, lacquers, glazings, primers, etc. It swirls the material with a powerful suction effect, without splashing.

The classic paint mixer for versatile DIY and professional use with average machine loads. For paints, lacquers, primers, fine and creamy plaster, thin coatings, etc.

The super-fast turbo mixer for all liquid and spreading materials as well as adhesives and resin compounds. The tool generates a strong flow from the bottom up. Optimal flow conditions when used with high-speed drives.

The optimal mixing tool for small volumes of tile adhesives, ready-mixed mortars and pointing mortars. Notably smooth mixing action makes it ideal for high-speed machines, e.g. power drills.

Rugged professional mixing tool, ideal for liquid and fibrous materials as well as for gypsum plaster. Large volumes possible, without splashing. For high power machines only, as machine loads are high.

This mixing tool generates high shear forces for a powerful suction effect and prevention of lump formation. Notable for good homogenization of fillers, as well as adhesives and sealants, bitumen coatings, epoxy-resin compounds, etc. Easy to clean because material does not stick.

Suitable for diverse applications, this mixing tool is notable for very good conveyance of the material. Two mixing helixes for easy guidance in the material and minimal stress on the machine. For all sticky and viscous materials, e.g. tile adhesives, building mortars, ready-mixed mortars, plasters, fillers, etc.

The particularly rugged professional mixing tool for tough day-to-day building site service. 3 mixing blades for fast results with all heavy and highly-viscous materials. It is particularly suitable for all types of mortar, plaster, screed, quartz-filled epoxy-resins, etc.
